The Nord PSHCE Skills Passport

A Guide for Students, Teachers, and Parents

---

1. What is the Skills Passport?

The Nord PSHCE Skills Passport is a structured four-year programme that runs from Year 7 to Year 10. It is designed to give every student a clear, personal record of their journey through Personal, Social, Health, and Economic education. Rather than a traditional workbook, the passport functions as a **stamp-based achievement record** — a tangible document that grows with the student year on year, reflecting the knowledge, values, and life skills they have built along the way.

Each passport covers a single academic year and is divided into two terms: **Spring** and **Summer**. Every lesson in the curriculum is represented by a numbered stamp circle. When a student completes a lesson and demonstrates their understanding, their teacher awards them a stamp. By the end of the year, a fully stamped passport represents a complete and engaged PSHCE journey.

The passport is not an assessment tool in the traditional sense. It does not produce grades or levels. Its purpose is to make learning visible, to celebrate progress, and to give students a sense of ownership over their personal development.

---

2. How the Stamp System Works

Each lesson in the passport is represented by a circular stamp space, numbered in sequence and labelled with the lesson title and its associated **core value** (for example, *Resilience*, *Respect*, or *Self-Awareness*). The stamp circle remains empty until the student has completed the lesson.

Stage	What Happens
Before the lesson	The student sees the topic and value listed in their passport, setting a clear expectation for what they will learn.

Stage	What Happens
During the lesson	The student participates in discussion, activities, and reflection tasks linked to the topic.
After the lesson	The teacher awards a stamp to students who have engaged meaningfully with the material.
End of year	The student completes the **My Reflection** section, writing a personal response to the year's learning.

A stamp is not simply given for attendance. It represents active engagement — asking questions, contributing to discussion, completing tasks, and showing that the lesson's core value has been understood and considered.

---

3. The Four-Year Curriculum Journey

The PSHCE curriculum is deliberately **progressive**. Each year builds on the last, introducing more complex and nuanced themes as students mature. The table below gives an overview of the thematic focus for each year group.

Year Group	Central Theme	Curriculum Focus
Year 7	Foundations & Transitions	Mental health, personal safety, identity, and healthy habits
Year 8	Social Awareness & Digital Citizenship	Peer influence, online responsibility, equality, and substance awareness
Year 9	Risk, Responsibility & Respect	Online dangers, mental health complexity, privilege, and discrimination
Year 10	Relationships & Future Readiness	Consent, healthy relationships, sexual health, and political literacy

Year 7 — Foundations and Transitions

Year 7 marks the beginning of the PSHCE journey. The curriculum is designed to support students through the significant transition into secondary school, giving them the language and frameworks to understand their own mental health, stay safe online, and begin thinking critically about identity and relationships.

Spring Term lessons cover: Understanding and Coping with Anxiety · Stress and Relaxation · The Science of Happiness · Online Grooming and Spotting the Signs · Who Are Our Influencers? · Traditions and Beliefs · Bullying and Anti-Bullying

Summer Term lessons cover: What is Sexual Harassment? · Healthy Lifestyle · Energy Drinks · Personal Hygiene · Understanding Puberty · Understanding Menstruation

The Year 7 passport closes with a **My Year 7 Reflection** prompt, asking students to identify the most important thing they have learned during the year.

Year 8 — Social Awareness and Digital Citizenship

In Year 8, students move beyond foundational concepts and begin to engage with the social world around them in greater depth. The curriculum challenges students to think critically about peer pressure, the responsibilities that come with being online, and the legal and social frameworks that govern equality and fairness.

Spring Term lessons cover: Stress and Relaxation · What is Peer Pressure? · Cyber Safety · The Equality Act, Sex and Gender · Bullying or Banter? · What is Misogyny?

Summer Term lessons cover: Self-Awareness · Vaping · Screen Time · Alcohol · Body Image

The Year 8 passport closes with a **My Year 8 Reflection** prompt, asking students to consider how their understanding of the world around them has changed.

Year 9 — Risk, Responsibility, and Respect

Year 9 represents a significant step up in complexity. Students are asked to engage with topics that carry real-world risk and require a mature level of critical thinking. The curriculum addresses the darker sides of the digital world, explores how mental health can deteriorate, and introduces concepts of privilege and systemic discrimination.

Spring Term lessons cover: Mental Health and Depression · Positivity · Online Trolls and Cyberbullying · The Dark Web · Bullying and Respect · Privilege

Summer Term lessons cover: Masculinity · Sexual Orientations · Alcohol · Prescription Drugs

The Year 9 passport closes with a **My Year 9 Reflection** prompt, asking students to reflect on a moment when their thinking was genuinely challenged or changed.

Year 10 — Relationships and Future Readiness

Year 10 is the final year of the passport programme. The curriculum is designed to prepare students for young adulthood, covering the most mature and complex themes in the PSHCE framework. The focus shifts toward healthy and unhealthy relationship dynamics, sexual health, and the ability to navigate a politically complex world.

Spring Term lessons cover: Building Resilience · Body Image · Deepfakes and Malicious Use · Online Radicalisation · Political Polarisation · Healthy versus Unhealthy Relationships

Summer Term lessons cover: Consent · Contraception · STIs · Alcohol

The Year 10 passport closes with a **My Year 10 Reflection** prompt, asking students to consider how they have grown across all four years of the programme and what values they will carry with them.

---

4. Core Values Across the Programme

Every lesson in the passport is linked to one of the following core values. These values are not incidental — they are the thread that connects the entire four-year curriculum. Students are encouraged to think about how each value applies not only to the lesson topic but to their own lives.

Core Value	What It Means in Practice
Resilience	The ability to face difficulty, adapt, and keep going.
Respect	Treating others — and yourself — with consideration, both online and in person.
Responsibility	Understanding that your choices have consequences for yourself and others.
Self-Awareness	Knowing your own emotions, strengths, and areas for growth.

Core Value	What It Means in Practice
Kindness	Choosing to act with empathy and care, especially when it is difficult.
Safety	Recognising risk and knowing how to protect yourself and others.
Critical Thinking	Questioning what you see, hear, and read rather than accepting it at face value.
Positivity	Cultivating a constructive and hopeful outlook, even in challenging circumstances.

---

5. Guidance for Parents and Carers

The PSHCE Skills Passport is designed to be a conversation starter, not just a school document. Many of the topics covered — from mental health and online safety to relationships and consent — are subjects that benefit enormously from open dialogue at home.

We encourage parents and carers to:

- **Look through the passport together** at the start of each term so your child knows you are interested in what they are learning.
- **Ask open questions** after lessons — not "Did you learn anything today?" but "You had a lesson on peer pressure this week — what did you think about it?"
- **Avoid dismissing topics** as too sensitive or too young for your child. The curriculum is carefully sequenced to be age-appropriate, and your engagement at home reinforces the school's work.
- **Read the My Reflection section** at the end of the year. This is your child's own voice, and it often reveals more about their thinking than any report.

If you have concerns about any of the topics being covered, please contact the PSHCE lead at the school directly.

---

6. A Note on the Passport Design

The passport is produced by **Nord PSHCE** and is designed to feel like a personal document — something a student would want to keep, not lose. The cover art, stamp circles, and layout are all intentional choices designed to make the passport feel different from a standard exercise book. It is a record of growth, and it should feel like one.

Each year group receives a distinct passport. While the design language is consistent across all four years, the content, themes, and reflection prompts evolve to match the developmental stage of the student. A student who completes all four passports will have a complete record of their PSHCE journey from the age of eleven to fifteen.
